

## Summary

In the last four years, Duy Anh has been given the superpower to use any tool he wants to translating his logical prowess into instructions a computer deciphers. He enjoys crafting professional codebases using JavaScript. It is good enough for almost all cases – frontend, backend, collages, and goods.

He happy to do anything else that fits the needs at the moment in time, including bash scripting, YAML editing, Dockerizing, Microservices, Message Brokers, DBMS, Nix configuring, PHP, Go, Rust, C and all the cool stuff.

With the ability to work on both client and server sides, from ground to cloud, he has hands-on experience with projects in various domains including ecommerce, fashion, cashback, e-ticketing, SaaS, etc.

He love Vim, Tmux, Allacrity and will be happy to answer all your questions.
